KPIs Process Flow Chart

Part III – HR Operations Workflow

1. HR Operations Process Summary

The HR Operations process ensures effective management of the employee lifecycle after the hiring process, from employee activation through daily operational support until employee separation. HR Operations serves as the primary People & Culture representative for assigned projects and accounts, ensuring employees are operationally ready, compliant with company policies, and continuously supported throughout their employment.

HR Operations Process

1. Employee Handover from Personnel

The HR Operations team receives the employee from the Personnel Department after completing the onboarding process and begins coordinating with the assigned project to ensure a smooth transition into the employee's role.

2. Employee Activation Follow-up

HR Operations follows up on all employee activation requirements to ensure the employee is fully ready to start work, including confirming the project assignment, reporting manager, work location, and system activation.

3. Operational Readiness

The HR Operations team ensures the employee receives all required work tools, system access, mandatory training, and project requirements before deployment. HR Operations also follows up on the employee's two-week shadowing period and confirms with the Direct Manager that the employee is ready to work independently.

4. Workforce Management

HR Operations continuously supports employees throughout their employment by coordinating work schedules, attendance, leave management, manpower planning, and other operational requirements with the relevant managers.

5. Employee Relations

HR Operations serves as the primary People & Culture contact for assigned projects, supporting employees by resolving operational HR matters, addressing concerns, and coordinating with the relevant departments when required.

6. Investigation & Disciplinary Process

When an employee violates company policies or labor regulations, HR Operations coordinates the investigation process with the Direct Manager and Legal Affairs to ensure the case is handled fairly, documented properly, and concluded in accordance with company policies and applicable labor laws.

7. Employee Records & Compliance

HR Operations follows up with the Personnel Department to ensure employee records remain complete and compliant, including monitoring required documents, insurance activation, contract updates, and other employment requirements.

8. Resignation & Offboarding Coordination

HR Operations manages the resignation process by discussing retention opportunities with the employee and coordinating the offboarding process with the relevant departments until all exit requirements are completed.
